**“Dr. Michael Dourson is a highly qualified scientist who worked at EPA for 15 years, founded a program that characterized the health hazards of chemicals, and performed pro-bono work that saved a family near Cincinnati - in addition, his expertise on TCE helped 130 families near San Francisco. We wish him continued success in his future endeavors.”**  
EPA spokesman, Jahan Wilcox

Can EPA confirm that Dr. Dourson is no longer an federal employee, as his LinkedIn page suggests? If he hasn't yet resigned from the agency yet, when is his final day at EPA scheduled to be? What has he worked on during his time there? I plan to file a story on this by noon.

Thanks, C
